# E-LEARNING

The **LMS Moodle** supports the learning process. Moodle is a widely used learning platform designed to provide educators, administrators and learners with a single robust and secure system that creates a personalised learning environment.

The educational material for each program is being gradually disposed, per teaching unit, through the electronic classrooms.

During the programme, full **personal** educational support is provided as the trainee can address any questions to his appointed tutor through an online communication system. Courses with **community** educational support are also available offering an engaging learning environment.

# AIM OF OUR

Ultimate aim of our programmes is the meeting of the ***detected educational needs*** and the provision of complementary ***necessary qualifications*** in people that wish to amplify their knowledge and gain new ***professional skills***, thus improving their cognitive level and reinforcing their competitiveness within the market. However, our programmes in Arts and Culture offer a fascinating journey on different aspects of Ancient Greek and Mediterranean culture, providing an in depth understanding of what is generally believed to be the roots of Western civilization.
